LinkedIn Learning Trends

rock, paper, scissors

why?

Adopt a learning mindset.

Develop a bias towards action.

Develop comfort with uncertainty.

Enhance your ability to let go of your own ideas and support the ideas of others.

design thinking
what?

Design thinking is about accelerating innovation to create better solutions to the challenges facing business and society.

It starts with people – what we can **human centered design** – and applies to the creative tools of design, like storytelling, prototyping, and experimentation to deliver new breakthrough innovations.

TIM BROWN, CHAIR, IDEO

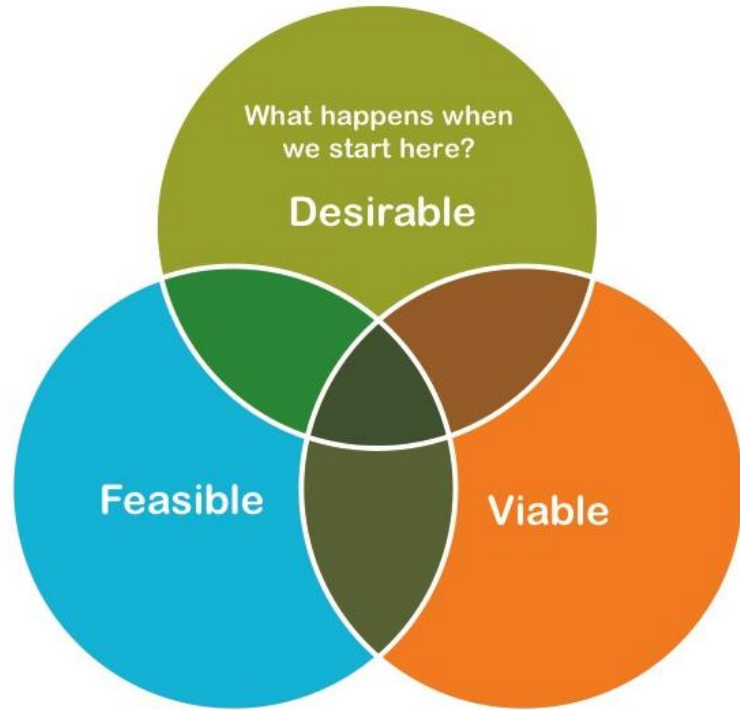

founder of IDEO

David Kelley

IDEO is a global design company. Our purpose is to create positive impact through design.

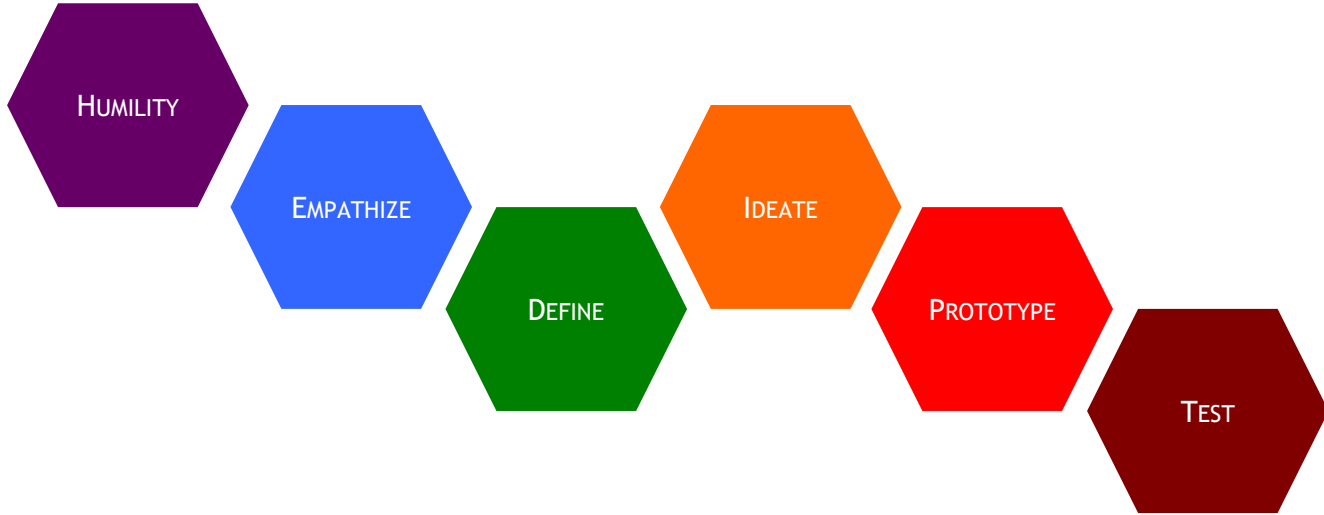

Innovation

design thinking
what?

design thinking
humility

Humility calls for different kind of leaders: those who are inclusive, encourage people's best thinking, energize creative talents, are willing to learn and are able to build trust. Humble leaders know they don't have all the knowledge or answers and therefore they actively listen to learn. They also know their own limitations and that self-awareness helps them get better.

Orly Maravankin - Forbes

design thinking
empathy

Empathy for the people you are designing for, and feedback from these users, is fundamental to good design.

Empathy is not sympathy.

empathy

begin with observation

What people say
they do and what
they actually do
are often different.

EMPATHIZE

empathy
exercise

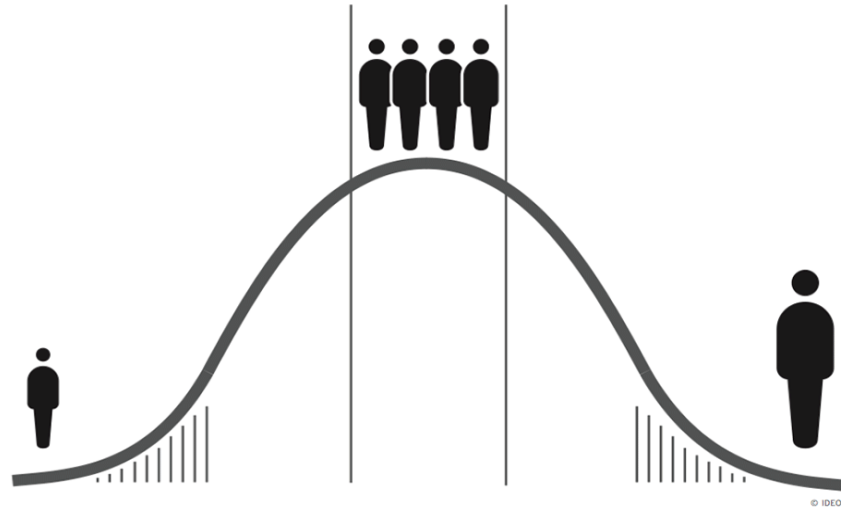

Be a tourist. Be an alien.

show me and tell me.

observation vs. inference

empathy
extreme users

empathy
analogous situations

empathy

finding analogous situations

What are some of the *elements*, *activities* and *emotions* involved? Make a list.

Where else do these things occur? Make a list.

observations

WHAT to observe

**work-
arounds or
adaptation
s**

How has a user
modified their
world to make
things easier?

**Things people
care about**

What are users passionate
about?

**Things that
surprise
you**

What's
unexpected /
outside your
expectations?

DEFINE

empathy

additional methods

Story evoking questions

last, best, first, worst

Ask lots of 'why' & 'how' follow-up questions

Ambition evoking questions

King for a day..., Harry Potter's wand..., Hermione's time timer..., unlimited funds...

define

observation to insight

observation

What – the facts

insight

Why – the interpretation

DEFINE

observation

this person rounded up when paying bills

DEFINE

define

observation to insight

observation

This person rounded up when paying bills.

insight

People round up their bill payments for speed, convenience, and peace of mind.

DEFINE

define

good insights are..

authentic

It should be supported by the observations you made.

non-obvious

The insight should be “news you can use,” not just something someone would immediately think of when describing the subject.

revealing

It offers a glimpse into how people think or feel.

DEFINE

break

What is one idea
you wish you could
implement tomorrow?

exemplars:

What is one idea you wish you could implement tomorrow that would...

Create greater understanding of our users needs/get closer to the user

Increase our agility and speed to delivery

Employ/enhance data utilization in your team(s)

Facilitate more frequent and productive cross-functional collaboration

Promote workplace diversity, inclusion, and belonging

BRILLIANT QUESTIONS: UNLOCK POSSIBILITIES

**“Fall in love with a problem,
not a solution.”**

HOW MIGHT WE ~~START~~ [USER] TO ~~ACHIEVE~~ [GOAL]?

Start with an open question, not an idea

*Desirability >
Compliance*

*Specify
the humans
at the heart
of your efforts*

*Their perspective,
not yours*

Pair up!

Get ready to create a “How Might We...?” question together based on your idea.

The User
(Empathy)

**The Imagined
Benefit or Behavior**
(Possibility)

Choose someone to go first.

Ask “Who will benefit from your idea?”

Ask “What are some of the key benefits to **(your user)**?”

Keep refining the questions until it clearly identifies a user and broad possibility to explore.

*How might we help **(user)** to **(key benefit)**?*

Congratulations!

You've just **Defined a Challenge**
that is **user focused**
and designed to
unlock possibilities!

identify extreme & analogous users

Work with your partner. For each of your HMW challenges:

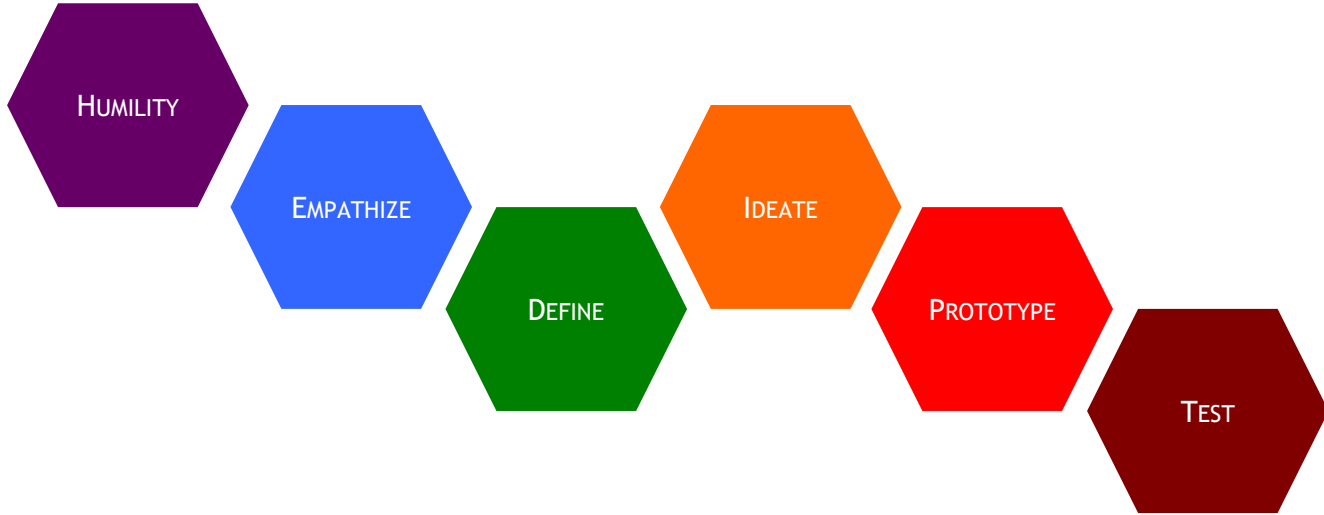

Identify a few extreme users

Who has highly refined or specialized needs? Novices? Lovers? Haters?

Identify a few analogous situations

**What are the elements, activities and emotions involved?
Where else do these occur?**

design thinking
what?

The best way to have a good idea is to have lots of ideas.

Linus Pauling, Scientist (Nobel 2x)

what can we learn from the pros at IDEO?

brainstorming rules

brainstorming rules

defer judgement

There are no bad
ideas at this point.
You can judge
them later.

brainstorming rules

encourage wild ideas

Wild ideas often
create real innovation.
It's easy to bring them
down to earth later.

brainstorming rules

build on the ideas of others

Think of 'and' instead of 'but'.
If an idea isn't working, build
on it and make it better.

brainstorming rules

stay focused on a single topic

You will get better
output if everyone
is disciplined.

brainstorming rules

one conversation at a time

Allow ideas to
be heard and
built upon.

brainstorming rules

be visual

Engage the logical and
creative sides of your brain.
A quick sketch can help
conceptualize your idea.

brainstorming rules

go for quantity

Set a big goal for the number of ideas and surpass it. Remember, you don't need a lengthy case for your ideas – they should flow quickly.

something to consider...

brainstorming rules

Defer Judgment

Encourage Wild Ideas

Build On The Ideas Of Others

Stay Focused On The Topic

One Conversation At A Time

Be Visual

Go For Quantity

IDEATE

design thinking

prototyping

evaluating prototypes & tests

giving feedback

The world is often
unkind to the new.
The new need
friends.

For aspects of an idea/concept you feel should survive for future iterations

To describe ways you think an idea/concept could be made even better

For aspects of an idea/concept that feel problematic or challenging

I like...

I wish...

I wonder...

design thinking

test to learn..

“

Fail early to succeed sooner.

DAVID KELLEY, FOUNDER, IDEO

TEST

design thinking

test to learn..

DESIGNEY experiments

Learn about an assumption/unknown

Quick test of small aspect with a few users

Iterate idea based on learning

GOAL

METHOD

OUTCOME

SCIENCEY

experiments

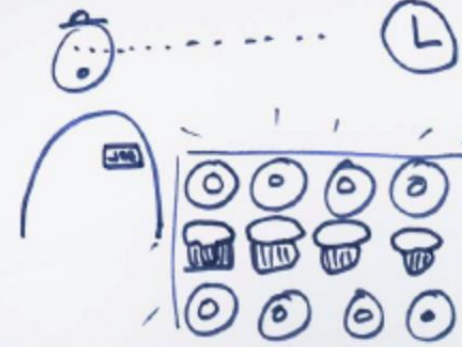

Prove/disprove

Full scale pilot of whole idea

Go/No Go decision

THESE DONUTS ABOUT TO GO BAD!

BETTER CALL DRONATE

design thinking

test to learn..

low risk

It might cost >
\$100

quick & easy

Around an hour inclusive
of set-up to data collection

generative

Outcomes should
help you get to a
far better solution

TEST

design thinking benefits

See new opportunities consistently

Connect deeply with your users/customers

Transform insights and data into actionable ideas

Create and implement new solutions with impact,
faster and more effectively

Mindsets, methods, tools and leadership for your creative change
